

Job Description: ASP/VB6/SQL/C++ Developer

Job Title: Senior Software Developer

Location: Warrington, Cheshire

Job Purpose:

Certero is a leading specialist in IT Asset Management/SAM and PC Power Management. As the only UK Independent Software Vendor (ISV), Certero develops innovative products and solutions including AssetStudio®, Certero SoftwareMetering for Decision Makers®, PowerStudio®, Passworks® and Acquaintia™ which focus on removing complex processes to drive efficiencies and create attractive ROI to organisations in both the Public and Private sectors.

Certero are looking for an experienced Developer who will contribute and influence the exciting development of Certero's current and future products. Have the gravitas to fully influence without the need to be supervised on a daily basis.

The role will focus on the development and ongoing maintenance of Certero's products and solutions. Certero are committed to using the latest technologies, thus, the ability to update solutions to .NET utilising Entity Framework, SAP.NET MVC3 and .NET4 is an advantage. The Developer should have 4-6 years industry experience and a good understanding of all aspects of the development lifecycle from design to implementation. Infrastructure knowledge covering Windows, UNIX, Linux and Networks will be an advantage.

Skills and Experience

- Proven track record of delivering projects at a senior level
- Excellent communication skills both written and verbal
- Good team player who will actively contribute at all stages
- Ability to produce high quality specifications, standards and briefs
- Previous experience working with bespoke and off-the-shelf products using similar technologies

This position is an exciting opportunity for an experienced Developer to make a mark and be part of an ambitious team developing innovative products in Software Asset Management and PC Power Management.

Knowledge

- Knowledge of languages including **C#, VB, MS SQL, HTML, XHTML, CSS, XML, SQL, ASP, C++, .NET**
- Advantageous: **Entity Framework, ASP.NET MVC3 and .NET4**
- In-depth knowledge of Windows, UNIX and Linux platforms
- Good understanding of Infrastructure Architecture
